

NOKIAN GROUND KING

PERFORMANCE INFORMATION

	PREMIUM LUG PATTERN TIRE	PREMIUM LUG PATTERN TIRE	NOKIAN GROUND KING	
	96	94	100	Advanced traction for work on loam soil
	88	100	95	Great traction performance on heavy clay soil
	91	98	100	More effective grip on sand
	56	71	100	Excellent traction on snow – ready for winter applications
	<70	70	90	Precise handling and excellent directional stability

ROLLING RESISTANCE³

+35%

+31%

REFERENCE

1) Test by Eurofins Expert Services Finland 2019
 2) Test by Nokian Tyres R&D
 3) ISO 28580 rolling resistant test by TÜV Süd

FUEL EFFICIENCY

Better fuel economy and lower emissions

COMFORT / NOISE LEVEL

Better comfort: low level of vibrations and noise

A NEW APPROACH TO PATTERN DESIGN

The Hybrilug™ technology challenges the limitations of the traditional lug and block tire patterns. Featuring an increased ground contact area, specially aligned pattern elements and more tread compound, the Hybrilug™ technology combines all-terrain mobility, great road properties and a long operating life.

ALL-TERRAIN MOBILITY, ON-ROAD PERFORMANCE

High performance in transits and road transport plays a major role in tractor contracting work, while all-terrain mobility and effective power transfer to the ground are a must on fields and work sites. **Nokian Ground King** tire offers both, supporting the versatility of multipurpose machines.

THE VERSATILITY REVOLUTION

Traction and stability on soft soil, speed, comfort and precision on road transports – the Hybrilug™ technology combines the best features of lug and block type patterns.

LONG-LASTING PERFORMANCE

With high-grade, wear resistant tread compound and a large ground contact area, Nokian Ground King offers excellent operating hours – even with extended on-road driving.

READY FOR HEAVY LOADS

For broader diversity of tasks, Nokian Ground King has high load-bearing capacity that allows the use of heavy work implements and high loads.
